

# Welcome

## in the Centre-Val de Loire Region

In response to the tragic situation in Ukraine, the Centre-Val de Loire Region is fully committed to ensuring the best possible support for Ukrainian families forced to flee their country.

In coordination with the French state authorities in the region, regional authorities, humanitarian associations, businesses and a large number of inhabitants, our region wishes to facilitate the settlement and support of people confronted with the trauma of war and then of exile.

Beyond the financial aid granted to help the coordinating structures and the calls for solidarity and donations, our Region has mobilised all of its resources to enable children and adults to find peaceful living conditions as quickly as possible: housing, schooling, French language training, access to training and employment, free regional bus and train transport, medical and psychological care.

**We want to express our total solidarity in the face of the human drama that the Ukrainians are experiencing.**

**François BONNEAU**

President of Centre-Val de Loire Region

**Delphine BENASSY**

Vice-president for culture and international cooperation
